# Our Testing Playground

## Testing the Product Page:

- Check if the product name, price, and description are correct.
  - Make sure the product image shows up.
  - buttons are visible.

## Testing the Checkout:

- Make sure valid information is accepted and the purchase goes through.
  - Check that missing information stops the process.

# Using Buttons:

- Make sure the buttons work correctly.

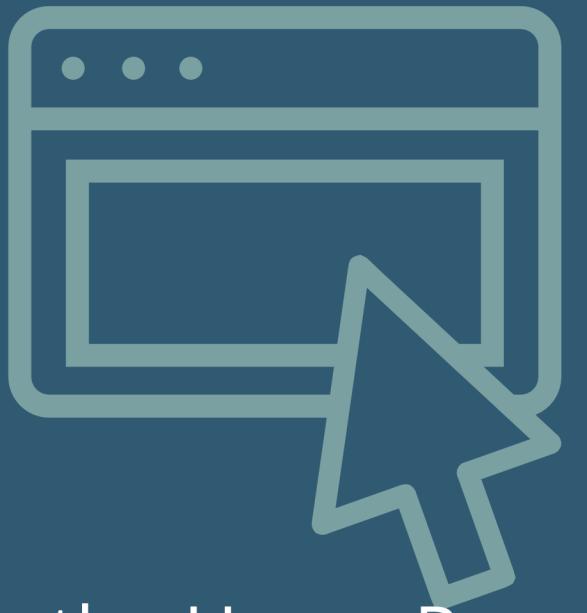

# Our Testing Playground

---

## Test the Login:

- Check that an error message shows for an invalid login.
- Make sure login fails with the wrong username or password.

## Testing the Home Page:

- Make sure the home page shows correctly based on the language and location.

## Error test

- The test checks that the site displays the correct user information on all pages.
