Our Testing Playground

FUNCTIONALITY Testing

Testing the Product Page:

- Check if the product name, price, and description are correct.
- Make sure the product image shows up.
- buttons are visible.

Testing the Checkout:

- Make sure valid information is accepted and the purchase goes through.
- Check that missing information stops the process.

Test the Buttons:

- Make sure the buttons work correctly.

Our Testing Playground

FUNCTIONALITY Testing

Test the Login:

- Check that an error message shows for an invalid login.
- Make sure login fails with the wrong username or password.

Testing the Home Page:

- Make sure the home page shows correctly based on the language and location.

Error Test

- The test checks that the site displays the correct user information on all pages.
